
DSM205 Item Applicability Maintenance

Overview

The sale of one or more Titles or groups of Titles can be restricted under certain circumstances. Orders or Titles not satisfying these restriction criteria pend for approval.

This Title Rights/Applicability function defines which Title can or cannot be sold to a customer, group of customers, states, regions, companies, etc.

For example certain products may only be available to Customer A. These products could be set up as inapplicable to all customers but applicable to Customer A. When a sales order is placed for this product for a Customer that is inapplicable for the product, the entry of the order is allowed to proceed but the order pends for review.

Purpose

This panel allows you to:

Maintain item applicability

Examples

This section illustrates examples concerning:

[Example 1: Maintaining Item Applicability](#)

Example 1: Maintaining Item Applicability

This example describes how to maintain item applicability

1. Select option **IM Master File Maintenance** from Base Modules > Distribution > Masterfiles > Database Management > Database Management > Item Masterfiles > Item Masterfiles.

DSM015 Item Master File Maintenance main panel is displayed.

Relevant Fields

ISBN

This is International Standard Book Number (ISBN) that uniquely identifies an inventory item in the system. Every inventory item has its unique ISBN.

Title

It is heading or a small description of the Inventory item.

Opt

Indicate to which one of the following you are adding Item Rights/Applicability details:

1 = Customer, 2 = Representative, 3 = Buying group,

6 = Branch, 7 = Key account, 8 = Company, A = Type of Sale 9 = Total.

Key

The key relevant to the option selected. For example if in the Opt you selected 1 = Customer the key required in this field would be a customer number.

A/U

Applicable/Unapplicable

In Title Applicability Maintenance, this flag resides on the Customer Masterfile as well as the Title Masterfile. In the Customer Masterfile it is used to identify whether or not a customer is authorized to purchase specific products under normal circumstances. In the Title Masterfile the flag determines whether or not a title may be sold to certain customers, groups of customers, sales representatives, companies, branches or key accounts under normal circumstances. The values are:

A = Applicable

U = Unapplicable

3. Key in the required fields and click OK

Item applicability is maintained.
