
DSZ510 Customer Master Validation

Overview

This facility validates all titles in the Customer Masterfile by checking the Control Files. Any title that has invalid data is listed along with its description, invalid data and the Error message. This is very useful when new titles are created or when the hierarchy has been changed. This report can be generated at any time. This validation process runs immediately when the option is selected from the menu and the report is automatically produced.

Follow up

Printouts

This is printout program.

No selection criteria are required and therefore it runs immediately when the menu option is selected.

This report displays the following information:

- Customer Number
- Registered Business Name of the Customer
- Invalid data
- Error Message
