

# TYM160 Work with Academic Curriculum

## Overview

Curriculum is setup by assigning a curriculum code and description of the curriculum, for High Schools, Primary Schools, Universities or other academic institution customers. Once a curriculum is setup, interest codes can be attached to it and the curriculum can be applied to the institution customer.

This program allows you to setup a new curriculum and attach interest codes to it.

## Examples

This section illustrates examples concerning:

[Example 1: Setup/Maintain a new curriculum](#)

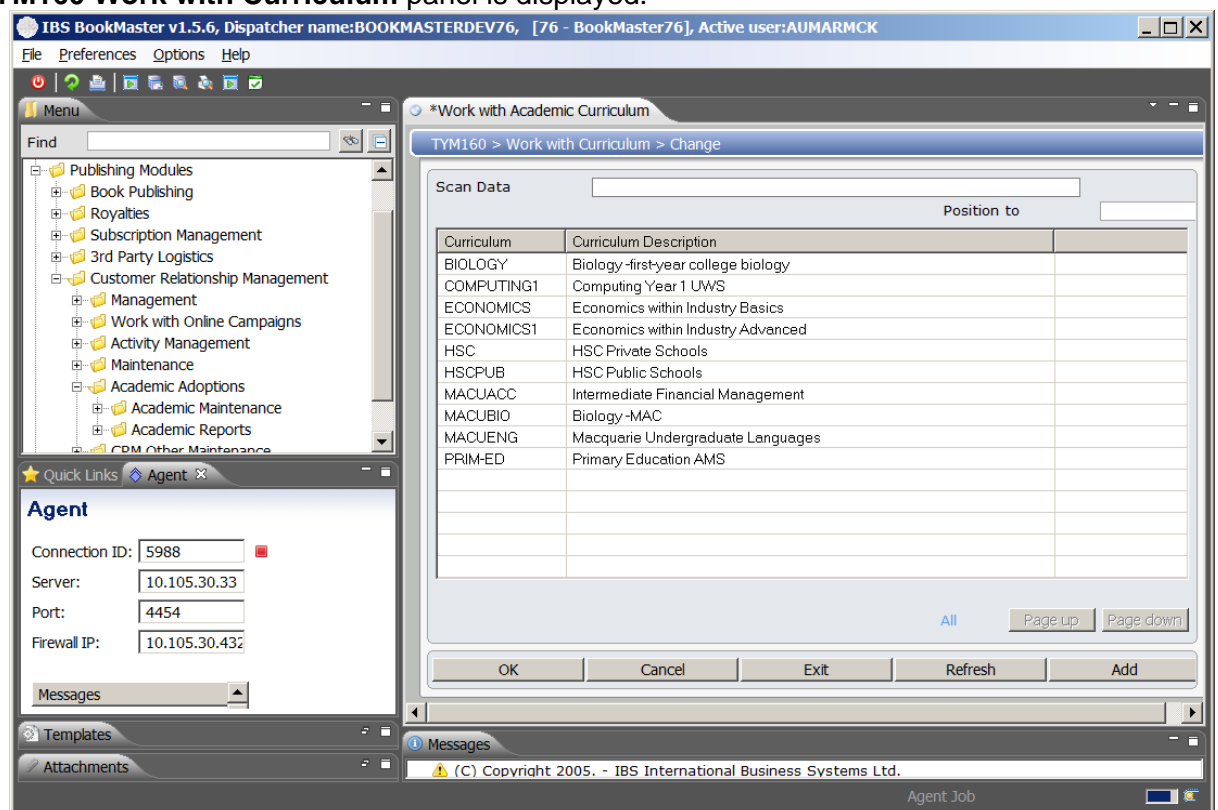

[Example 2: Maintain a curriculum](#)

### Example 1: Setup a new curriculum

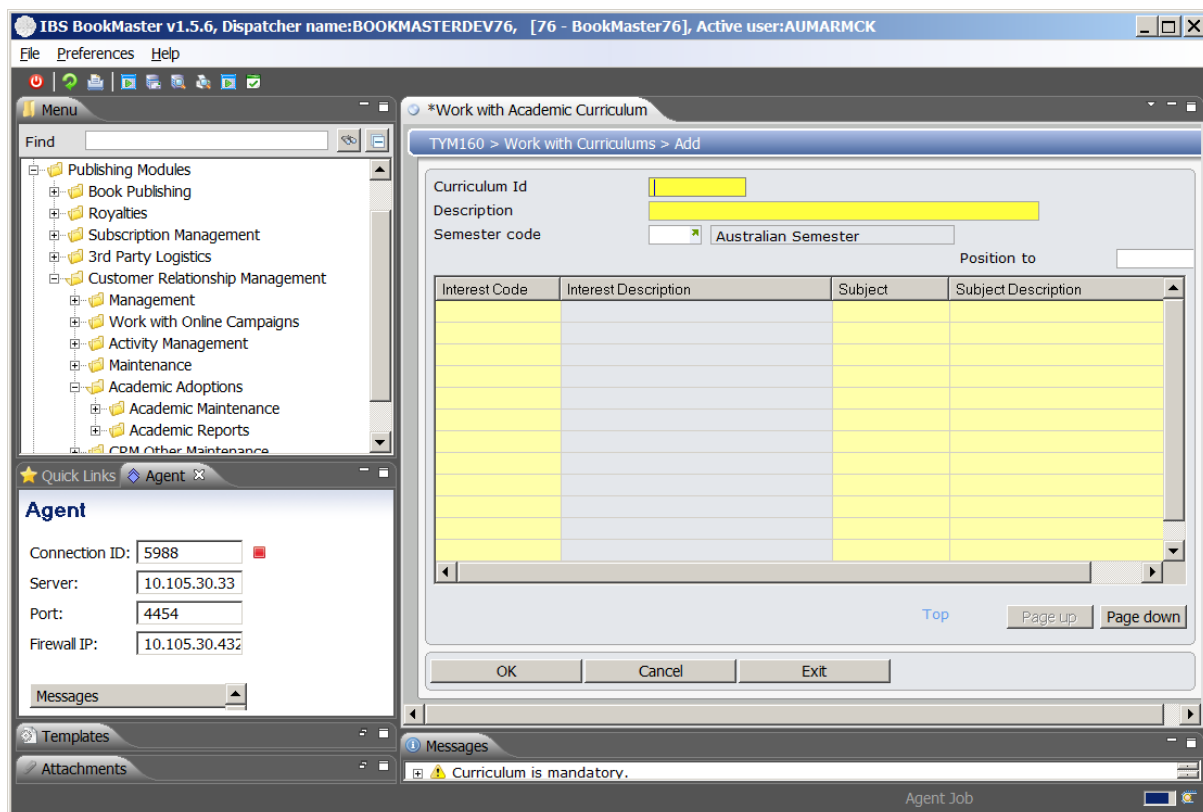

This example describes how to setup new curriculum and attach interest codes.

1. Select option **Work with Academic Curriculum** from Publishing>Customer Relationship Management>Academic Adoptions>Academic Maintenance menu.

TYM160 Work with Curriculum panel is displayed.

2. Click **Add**.

**Relevant Fields**

**Semester code**

Prompt and select a valid semester code. Semester codes attached to the curriculum define the number of semesters at an institution. Period or month can be used for the generation of the semester and the next semester; as specified in control file TMSTY/SEN-SMCD.

**Interest Code**

Interest codes that are applicable to the curriculum have to be attached to the curriculum here.

**Note** To maintain a curriculum, select the curriculum and click option **Change** instead of **Add**.

3. Key in the semester and the interest codes and click **OK** or press **<ENTER>**. The message **Record addition - successfully completed** displays on the screen.
