# WIO450 Import Warehouse Details

---

## Overview

This process is used for processing the details such as order dispatches, shipment receipts, returns, stock adjustments and stock transfer receipts from an external system.

Use the Error log Maintenance menu option to clear claims data.

---

## Examples

This section illustrates examples concerning:

[Example 1: Import warehouse details](#)

---

### Example 1: Import warehouse details

Write an introduction of the examples before you describe the actions in the example.

1. Select menu item **Warehouse Management** from **Distribution** main menu.
2. Select WH Interface Import WH Details from Whs Mgmt Interface menu.

**XAR905 Import External W/H Details** panel will be displayed.

3. Specify if the job should be sent to a job queue or run in batch and click **OK**.  
The warehouse details are imported from the external system to Bookmaster.
