
SMR080A Subscription Reports & Lists

Overview This program displays an initial access to this menu item where you can select the required report format. The format selected will determine the display of the selection fields.

Purpose This panel allows you to:
Print various subscription reports as specified in Control File TMSSM/RPT-SEL.

Examples

This section illustrates examples concerning:

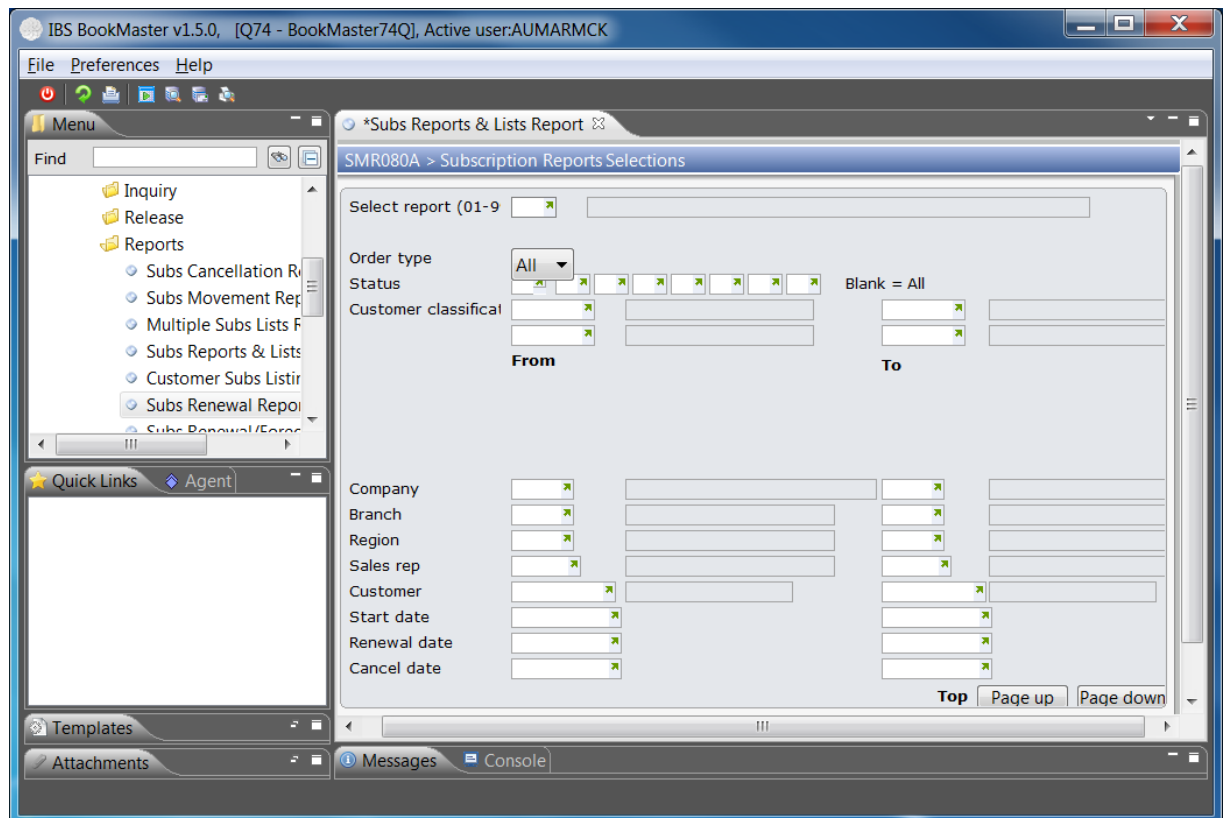

[Example 1: Subscription reports](#)

Example 1: Subscription report

This example describes how to run subscriptions reports as specified in Control File TMSSM/RPT-SEL.

1. Select menu item **Subs Reports & Lists Reports** from Publishing Modules>Subscription Management>Reports menu.

SMR080A Subscriptions Reports Selections panel is displayed.

Relevant fields

Select report (01-09) ID

The report format required for a specific selection is entered. Depending on the format selected the fields on the selection screen may vary.

Ascii file name

This is the name of the Ascii file. If the report format 01 is selected, the additional field of Ascii file name displays.

Order type

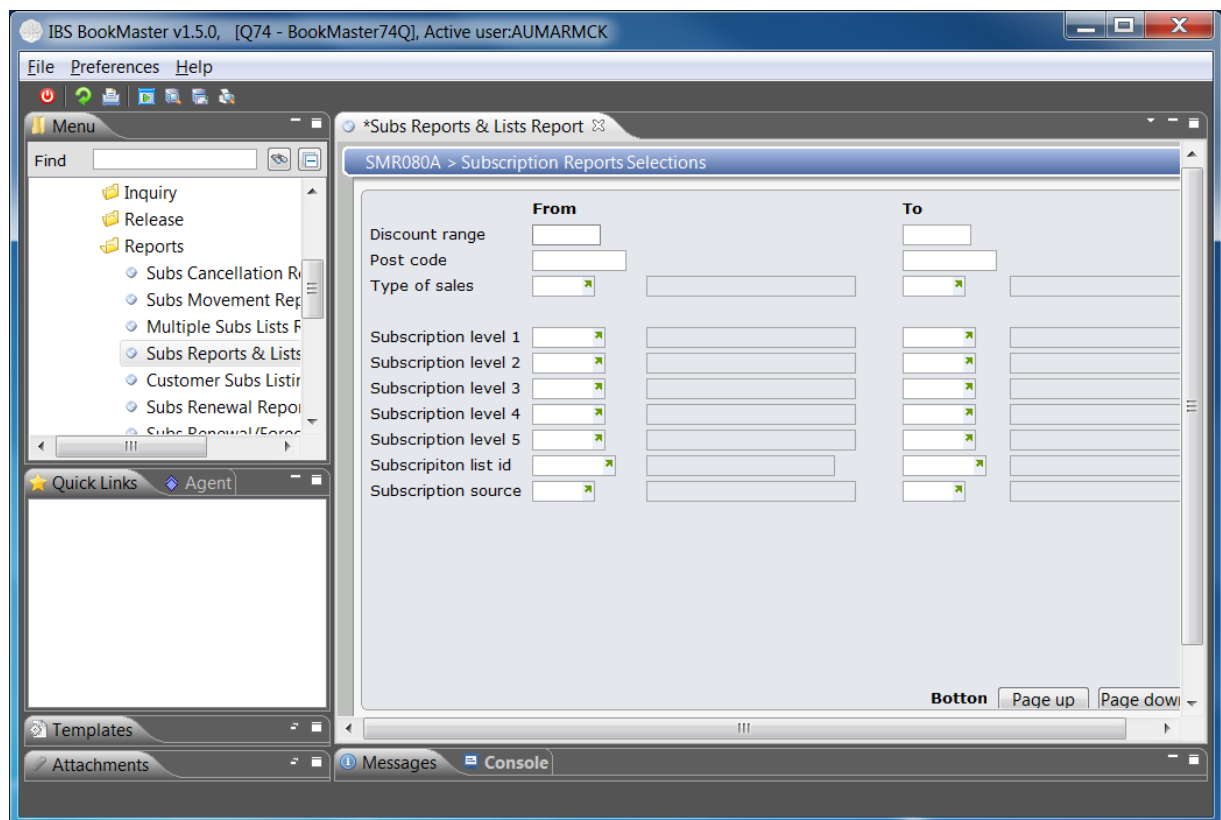

This determines the order type to be included in the report. Select All, Normal or Gratis.

Status

Subscription Orders with a specific status can be selected for reporting. One status or multiple status codes can be selected. If all Subscription Orders are required for the report, regardless of the status, leave this selection blank.

Depending on the report selected the Type of Sale and Subscription Source prints on the report.

2. Enter the selection for the report.
3. Page down and enter the required report selection range.

4. Click **OK** to run the selected report.

Other reports as specified in the Control File TMSSM/RPT-SEL are as listed below:
