# DSO200 Picking Plan Purge

---

## Overview

This option purges the ACTUAL pick plans from the file.

---

## Examples

This section illustrates examples concerning:

[Example 1: Purge Picking Plan](#)

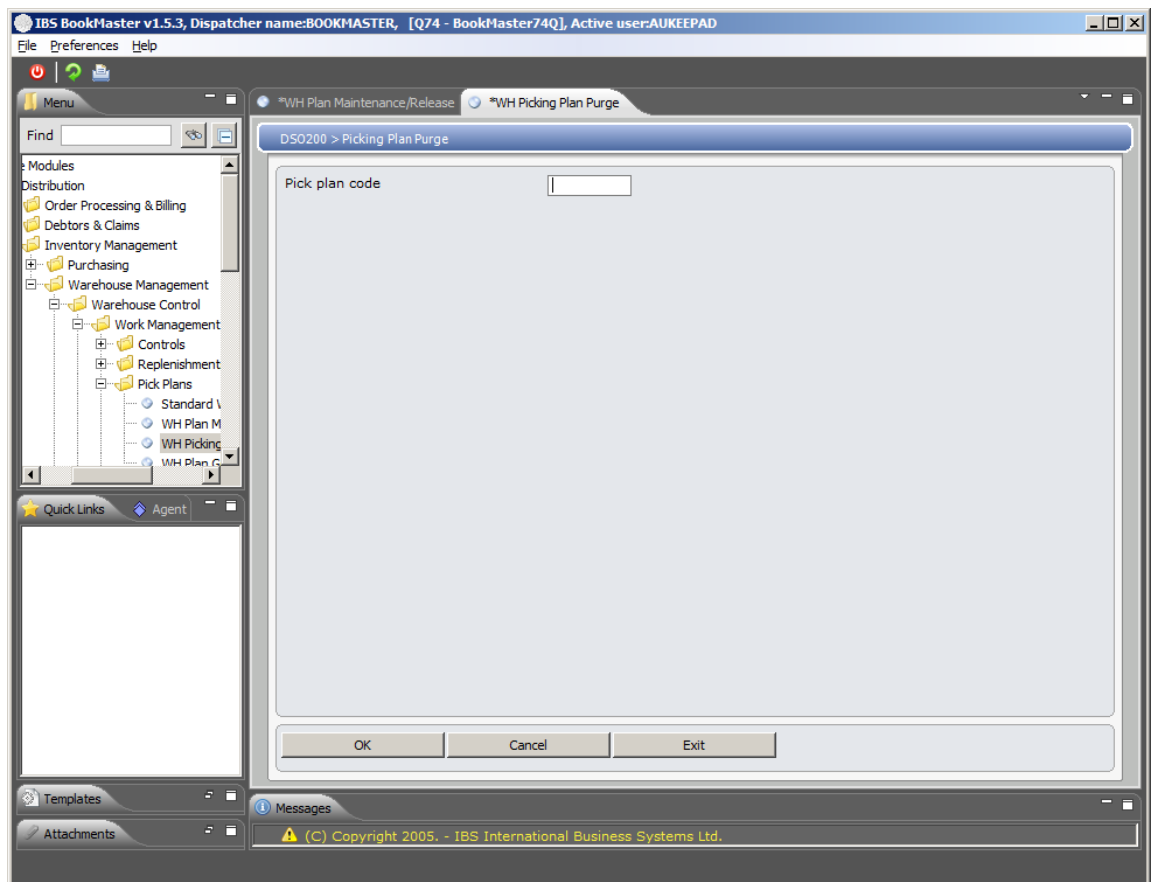

---

### Example 1: Purge Picking Plan

This example describes how to purge picking plan.

1. Select option **Picking Plan Purge** from Base Modules> Distribution> Inventory Management> Warehouse Management> Warehouse Control> Work Management> Pick Plans menu.

DSO200 Picking Plan Purge selection panel is displayed.

## Relevant Fields

## Plan code

A user defined Plan ID is to be entered.

When selecting a Pick Plan for maintenance, either one plan is selected or the field is left blank to select all current pick plans. Plan codes are specified when generating a plan.

Customer orders selected for picking release can be viewed and released by plan code. Entry of the plan code displays a listing of the customer orders that qualify.

2. Enter valid plan code and click **OK** twice to confirm the purge.

Picking plan purge gets confirmed.
