
DSO551 Update Catalogue Sequence within Subject

Overview

This program is used to perform a catalogue sequence update within a subject. This updates each title allocated against a catalogue so that they display in sequence for each subject.

This program reads the catalogue Masterfile and finds the sequence code from **TMSDS/CT-SUBJ** and then generates the workfile to hold item information with a sorting key retrieved from **TMSDS/CT-SUBJ**. The program then reads the workfile and updates the sequence within each subject code in the catalogue Masterfile.

Examples

This section illustrates examples concerning:

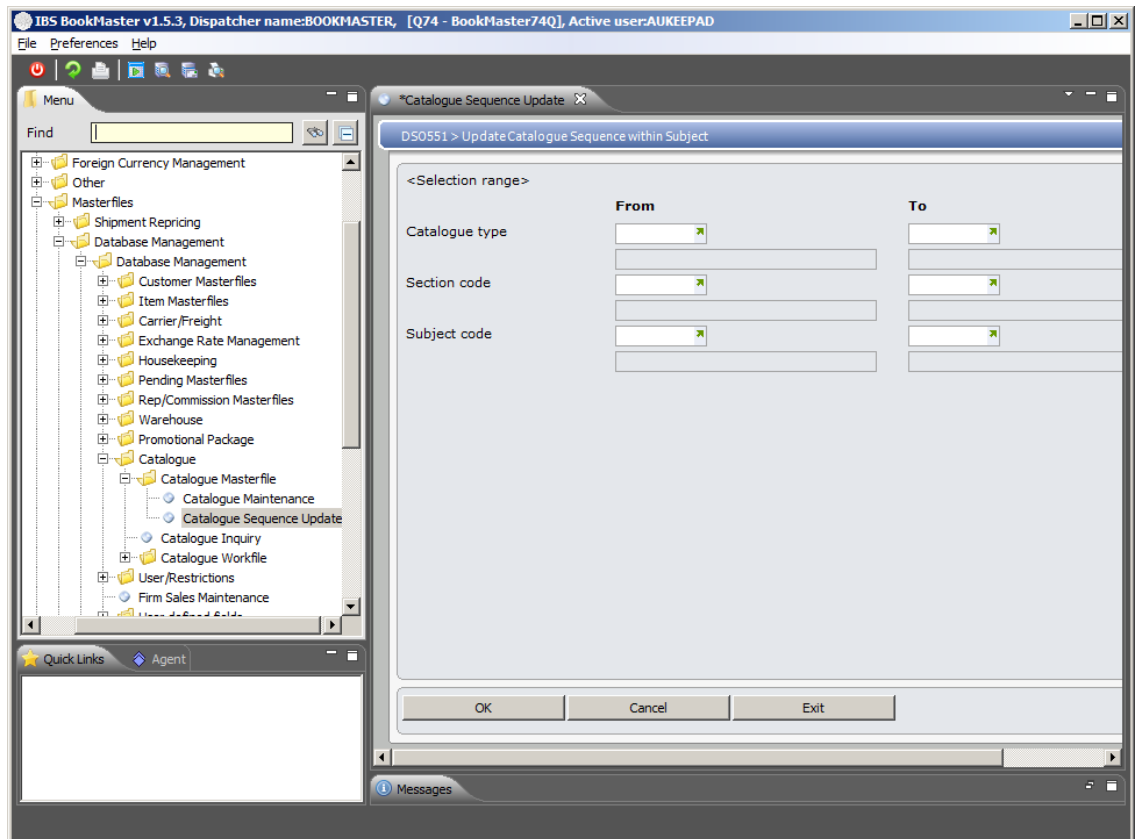

[Example 1: Catalogue Sequence Update](#)

Example 1: Catalogue Sequence Update

This example describes how to update catalogue sequence.

1. Select option Catalogue Sequence Update from Base Modules>Distribution>Masterfiles>Database Management>Database Management> Catalogue>Catalogue Masterfile menu

DSO551 Update Catalogue Sequence within Subject panel is displayed.

Relevant Fields

Catalogue Type

This is a user defined field and identifies the type of catalogue and is a mandatory entry.

Section Code

This is the section in which this catalogue can be located. Entry in this field is mandatory.

Subject Code

This is the Subject code under which this catalogue can be located and is a mandatory entry field.

Subject codes are sequenced by:

Seq code: A=Author, T=Title, P=Price, I=ISBN

Seq order: A=Ascending, D=Descending

2. Key in required fields and click **OK** until the message **Job completed** appears.
