EDO350 EDI: ANSI X12

EDI Send/Receive data

This process caters for directly accessing EDI networks such as GE Hosted Solutions and Pacstream.

The ONIX data upload is included in the EDI FTP process.

Functionality includes:

- **Incoming**: Customer Purchase orders, Shipping invoices, Debtors payments.

- **Outgoing**: Invoice, POA, ASN, Supplier Purchase orders and Catalogues.

The following Control Files are used in the setup:

- **TMSDS/EDI-FTP** File transfer location

- **TMSDS/EDI-FLOG** FTP logfile name

- **TMSDS/EDI-PCKM** Default Picking Methods by Source
