Updated translation control records with request to reprocess

Incoming report

**IP1 Database on Customer site**

Incoming file is received & processed and IP1 is updated. Email is sent to specified email addresses with message of completion or further action required.

If there are errors in a batch then

- view the errors via *Work with Batches* menu option
- update control records accordingly
- reprocess the batch via *Work with Batches* menu option

The process will continue until all the errors are fixed.
